Development of the economy depends on basic infrastructure facilities which include good transport system. The objective of conducting the Traffic Census is to assess the volume of transport on roads in the state. Traffic Census provides the data for formulating necessary strategies for the improvement of existing road conditions including their extensions and widening of carriage way of different roads.

The present publication is the 35<sup>th</sup> in the series. Data has been analyzed in the context of Road Carriage Way Width (R.C.W.W.) and Private Car Unit (P.C.U.) on National and State Highways of the State.

This Directorate gratefully acknowledges the co-operation and support extended by the Roads and Buildings Department, Government of Gujarat for providing basic traffic census data for preparation of this report.

I hope that this publication would be useful to Planners and Policy Makers in their quest for development of the road system, Research Fellows and those who are interested in the infrastructure for economic development of the State.

Suggestions towards the improvement of this publication will be appreciated.

## **Traffic Census Results (TCR) on National Highways (NHs) and State Highways (SHs)-2013**

### **1. Introduction:-**

- 1.1 The efficiency of transport depends on the network of roads and the transport system. Transport plays an important role in development of various sectors of economy like industries, agriculture, commerce trade etc. Transport system links producers with consumers. The development of the economy depends heavily on a good transport system. The road transport system in general consists of animal driven and power driven vehicles like scooters, mopeds, motor cycles, rickshaws and other three wheelers, four wheelers like cars, jeeps, trucks, buses etc.
- 1.2 Gross State Domestic Product (GSDP) and Net State Domestic Product (NSDP) at constant (2004-05) prices (Percentage Distribution) of 2012-13 indicates that the Industry Group "Transport, Storage and Communications" contributes share of 8.9% and 9.3% respectively of which "Transport by other means" contributes share of 4.2% to each.
- 1.3 The road network is an important constituent of the transport sector. Out of total road length of 78558Kms. as on 31-3-2013 in the State, National Highways and State Highways work out to be 3262 Kms. and 18506 Kms. respectively. This shows that National and State Highways together accounts for 27.71 % of total roads in the State as on 31-3-2013.
- 1.4 With a view to collect statistical information about traffic on National and State Highways periodically, Roads and Buildings Department, Government of Gujarat conducts Traffic Census every year during April and October at selected count posts on different road sections of various categories of roads.

## **2. Objective:-**

- 2.1 The objective of the Traffic Census is to assess the volume of traffic on various road sections. It also provides useful data regarding composition of traffic intensity by type of roads. Estimates of traffic intensity at various road sections provide a measure of adequacy of RCWW and also helps to identify the road sections that need to be widened.

## **3. Methodology : -**

- 3.1 Various count posts are set up at different points on different road sections of the State. The census is conducted round the clock for seven days on the National Highways and for three days on the State Highways by the Roads and Buildings Department at there count posts. A complete count of all vehicles which pass through the count posts in both the directions (up and down) is taken during the census. For the purpose of data collection, a day is divided into 3 shifts of 8 hours each. Different enumerators and supervisors of the Roads and Buildings Department are employed for different shifts for each direction on each count post. The scrutiny, coding, data entry, computerization and publishing of the data collected by the Roads and Buildings Department are carried out by the Directorate of Economics and Statistics. The details of functions and steps involved in processing Traffic Census data are given in the Annexure.

## **4. Coverage :-**

- 4.1 The data presented in this report is based on the number of vehicles passing through 44 count posts in either direction on different sections of National Highways in both rounds and through 777 count posts in April-2013 and 778 count posts in October-2013 round on different sections of State Highways.

## **5. Reference Period :-**

Counting of vehicles passing through different count posts was done two times during the year 2013.during April and October.

**6. The Criteria for measuring Private Car Units (PCUs):-**

6.1 The following equivalent Private Car Units (PCUs) has been recommended by the Joint Technical Group for Transport Planning, constituted by the Planning Commission, New Delhi to convert the traffic of different types of vehicles into equivalent PCUs.

**Recommended PCU Factors for Various Type of Vehicles**

<b>Sr. No.</b>	<b>Vehicle Category</b>	<b>Vehicle Sub Category</b>	<b>Vehicle Type</b>	<b>PCU Factor</b>
1	Motorised Vehicle	Passenger Vehicle	Scooter/Motorcycle	0.50
2	Motorised Vehicle	Passenger Vehicle	Auto Rickshaw/ Chhakda	1.00
3	Motorised Vehicle	Passenger Vehicle	Car/Jeep(Old Technology)	1.00
4	Motorised Vehicle	Passenger Vehicle	Car/Jeep(New Technology)	2.00

6.2 The above conversion factors have been used to estimate equivalent Private Car Units (PCUs). Bicycles and the vehicles other than those

mentioned above have not been taken into account for estimating traffic intensity in terms of PCUs.

- 6.3 The Joint Technical Group has also recommended norms for maximum traffic capacity for different road carriage way widths in terms of equivalent PCUs per day. These norms constitute the basis for deciding the width of road carriage ways under mixed traffic conditions.

**Guidelines for capacity of Roads and Rural Areas by the Indian Roads Congress (1990).**

<b>Sr. No.</b>	<b>Category of Road</b>	<b>Standard Width</b>	<b>Traffic Capacity (No. PCUs per day)</b>
1.	Single lane road	3.75M	2000 PCUs
