## **PREFACE**

The National Sample Survey Organisation has conducted a country-wide integrated sample survey of households on Consumer Expenditure, Employment and Unemployment and Non-agricultural Enterprises in the Informal sector in 55th round during July, 1999 to June, 2000. The data under state sample has been analysed and important results are presented in this report along with all-India results for comparison purposes. The estimates of key characteristics of households like Consumption pattern, Caste, household type, source of energy, lighting, cooking and Monthly Per Capita Expenditure. The survey on Non-Agricultural Enterprises in Informal Sector covered enterprises carrying out the activities of manufacturing, construction, trading, hotel and restaurants, transport, storage and communications, financial intermediaries, real estate, renting and business services, education, health and social work and other community, social and personal services. Some salient features like number of enterprises and their workers, value added and other key characteristic of the non-agricultural enterprises in the informal sector are worked out. The vital informations regarding Employment and Un-employment with usual status for reference period of one year are also presented in this report.

It is hoped that the information presented in this report will be useful to planners and research workers.

Comments / suggestions from the users are welcome.

Place: Gandhinagar  
Date: August , 2004

Economics & Statistics,  
Gandhinagar

## *High lights*

### **(A) Household Consumer Expenditure :**

- 1. Total number of 5234 households were surveyed in State, out of them 47.42% were in rural sector and 52.58% were in urban sector.**
- 2. Total number of estimated households were 87.30 lakhs, out of these households 69.06% were in rural and 30.94% were in urban sector.**
- 3. Total number of estimated persons worked out as 4.24 crores, out of them 71.20% persons and 28.80% persons were in rural and urban sector respectively.**
- 4. Average household size worked out at 5.00 and 4.52 in rural and urban sector respectively.**
- 5. MPCE worked out to Rs. 586 and Rs. 901 for rural and urban sector respectively while average MPCE for the state worked out to Rs. 683**
- 6. Out of total expenditure in rural sector 61% and 39% counts for food and non-food items respectively, while in urban sector it counts equally for both items.**
- 7. The average living standard of people of Gujarat State is comparatively better than that of All-India level.**
- 8. The MPCE is higher in urban sector as compared to rural sector. This difference is due to higher income of households in urban areas as compared to rural areas.**
- 9. Out of total estimated 4.24 crore persons 60.84 % were literate and 39.16% were illiterate.**

## **(B) Informal Non-agricultural Enterprise :**

- 1. Total number of 8161 enterprises were surveyed in State, out of them 45.19% were in rural sector and 54.81% were in urban sector.**
- 2. Total number of Non-Agricultural enterprises has been estimated as 16.36 lakhs, out of these 33.86% were located in rural sector and 66.14% were located in urban sector.**
- 3. Total number of non-agricultural workers were estimated as 35.09 lakhs , out of them 24.37% and 75.66% were in rural and urban sector respectively.**
- 4. Annual estimated gross value added per worker is worked out as Rs. 37607 , while for rural and urban sector it was worked out as Rs. 24234 and Rs. 41914 respectively.**
- 5. Out of total number of enterprises 89.7% were run under male proprietary.**
- 6. On an average 98.3% enterprises were run under perennial operation.**
- 7. On an average 91.5% enterprises operated for more than 9 months during the year.**
- 8. Total loan outstanding per enterprise worked out as Rs. 11375.**
- 9. About 67.3 % enterprises were located within household premises.**
- 10. By status about 15.9% enterprise were reported expanding.**
- 11. About 29% enterprises reported as maintaining books of account.**
- 12. About 4.2% enterprise is worked out as working on contract.**

### **(C) Employment and Unemployment :**

- 1. Total number of 5235 households were surveyed in State, out of them 2482 (47.41%) and 2753 (52.59% ) were in rural and urban sector respectively.**
- 2. Out of total enumerated 25336 persons in the State, 12597 (49.72%) and 12739 (50.28% ) persons were in rural and urban sector respectively.**
- 3. An estimated 66 % and 60% of males in rural and urban sector were in labour force respectively, which comprise both the work force employed and unemployed. The corresponding percentages for females were 30% and 9% in rural and urban respectively.**
- 4. Out of total population 48% and 35% persons were in employed category in rural and urban sector respectively as per their usual status.**
- 5. The worker population ratio (WPR) differed between males and females in both rural and urban sector. In rural sector the rate was 66 and 30 percent for males and females respectively. In the urban sector it was 58 and 9 percent for males and females respectively.**

# Chapter 1

## Introduction

- 1.1** The fifty-fifth round of NSS was conducted during July 1999 to June 2000 for collecting information on (1) household consumer expenditure, (2) employment - unemployment and (3) informal non-agricultural enterprises (other than those engaged in industrial categories of mining & quarrying, electricity, gas and water supply) from nationwide samples of households or enterprises. The household consumer expenditure schedule (Schedule 1.0) was canvassed for 1,20,309 households located in 6,046 villages and 4,116 urban blocks, for Central Sample (All-India) while for Gujarat State 5,234 households located in 208 villages and 232 urban blocks were canvassed as a state sample. Through the consumer expenditure schedule, data collected on quantity and value of household consumption of different goods and services. Information on perception regarding sufficiency of food intake from the sample households was also collected. The final outputs for consumer expenditure is Monthly Per Capita Expenditure of household as a Socio-Economic measurement. Also, demographic features like age, sex, education, occupation etc. were collected for household members.
- 1.2** In this survey, an enquiry was conducted to provide the estimates on various characteristics pertaining to Employment and Unemployment through the schedule 10. These estimates were measured in terms of three basic approaches viz. usual status, current weekly status and current daily status. Reference period for usual status is 365 days preceding the date of survey, 7 days preceding the date of survey for current weekly status and each day of the 7 days preceding the date of survey for current daily status. Data were collected on the activity status of all persons, for those seeking or available for work and also for those remaining out of labour force.
- 1.3** The third enquiry conducted in this survey was on **Non-Agricultural Enterprises in the Informal Sector**. The non-agricultural enterprises engaged in the activities of manufacturing, construction, trading and repair services, hotels and restaurants, transport, storage and communications,

financial intermediation, real estate renting and business activities, education, health and social work, other community, social and personal service activities (excluding domestic services) were covered in this survey. Information on characteristics of the enterprises like fixed assets, employment, expenses and receipts, values added, employment etc. was collected from the enterprises under surveyed.

**1.4 Period of Survey and Geographical Coverage :** The period of the fifty-fifth round survey was of one year duration starting from July – 1999 to June – 2000. The field work was conducted into four sub-rounds, each of three-month duration with equal number of sample First stage Units allotted to each sub-round all over five NSS regions of Gujarat State.

**1.5 Units of Survey and Sample size :** The stratified Sampling design was utilized for this survey. The first stage sampling units (FSUs) were the Villages in rural sector and Urban Frame Survey (UFS) blocks in urban sector according to 1991 census. The Ultimate stage units were the households for canvassing consumer expenditure (schedule 1.0), employment–unemployment (schedule 10), and informal non-agricultural enterprises for (schedule 2.0). The Ultimate Stage units were selected by the method of circular systematic sampling from the selected frame.

## **Chapter 2**

### **Concepts and definitions**

#### **2.1 Household :**

A group of persons normally living together and taking food from a common kitchen constitutes a household. The word normally means that temporary visitors are excluded but temporary stay-aways are included. Thus a son or daughter residing in a hostel for studies is excluded from the household of his/her parents, but a resident employee or resident domestic servant or paying guest (but not just a tenant in the house) is included in the employer/host's household. 'Living together' is usually given more importance than 'sharing food from a common kitchen' in drawing the boundaries of a household in case the two criteria are in conflict; however, in the special case of a person taking food with his family but sleeping elsewhere due to space shortage, the household formed by such a person's family members is taken to include the person also. Each inmate of a mess, hotel, boarding and lodging house, hostel, etc. is considered a single-member household except that a family living in a hotel (say) is considered to be one household only; the same applies to residential staff of such establishments.

#### **2.2 Household Size :**

The size of a household is the total number of persons in the household .

#### **2.3 Household Type :**

For rural sector, household type were classified into five types while in urban sector households were classified into four types, on the basis of the occupations pursued by the household members. The five types of rural households are

- (i) **Self Employed in non-agriculture:** If household's source of income from non-agriculture is greater than that from rural labour as well as that from other gainful sources put together, will be classified as Self Employed in non-agriculture.
- (ii) **Agricultural Labour :** If household's source of income from agricultural labour was 50% or more of its total income, was classified as Agricultural Labour.

- (iii) **Self employed in agriculture** : If household's source of income from agriculture was 50% or more of its total income, was classified as Self employed in agriculture.
- (iv) **Other Labour** : If the household does not belong to the above three household types and its income from total rural labour was greater than that from all self-employment and from other gainful sources, was classified as Other Labour.
- (v) **Other Households** : If the household does not belong to above four type was classified as "Other Households"

The four types for urban households are (i) Self Employed, (ii) Regular wage / salary earner, (iii) casual labour and (iv) Other Households. A household was classified according to the major sources of its income from "gainful employment" during last 365 days preceding the date of survey. A household not having any income from gainful employment was classified as "Others".

#### **2.4 Household Group :**

Four social groups are (1) Scheduled Tribe (ST), (2) Scheduled Caste (SC), (3) Other Backward Class (OBC), and (4) Other Households. In case, different members of household belong to different social groups, the group in which the head of the household belongs has been considered as the social group of the household.

#### **2.5 Household consumer Expenditure :**

The expenditure incurred by a household on domestic consumption during the reference period is the household's consumer expenditure. The household consumer expenditure is the total of the monetary values of consumption of various groups of items, normally, (i) food, pan (betel leaves), tobacco, intoxicants, fuel and light, (ii) clothing and footwear and (iii) miscellaneous goods and services and durable articles. For groups (i) and (ii), the total value of consumption is derived aggregating the monetary value of actually consumed during the reference period. An item of clothing and footwear would be considered to have been consumed if it is brought into maiden or first use during the reference period. The consumption may be out of (i) purchases made during the reference period or earlier ; (ii) home grown stock, (iii) receipt in exchange of goods and services; (iv) any other receipt like gift, charity,

borrowing and (v) free collection. Home produce is evaluated at the ex-farm or ex-factory rate. For evaluating the consumption of miscellaneous goods and services and durable articles, the expenditure made during the reference period for the purchase of goods and services is considered as consumption.

## **2.6 Monthly Per Capita Consumer Expenditure (MPCE) :**

For a household, this is household consumer expenditure over a period of last 30 days divided by household size. A person's MPCE is understood as that of the household to which he/she belongs.

## **2.7 Value of Consumption :**

Consumption out of purchase is evaluated at the purchase price. Consumption out of home produce is evaluated at ex-farm or ex-factory prices. In case of free gifts, loans, free collection and goods received in exchange of goods, the value of consumption is imputed at the rate of average local retail prices prevailing under reference period.

## **2.8 MPCE Class :**

The MPCE classes have been assigned to the households on the basis of monthly per capita level and 12 classes are formed in each sector Rural and Urban. The class intervals for both sector are formed in such a way that upper as well as lower two class intervals contained 5% of population in each sector, while remaining eight class intervals contained 10 % of population.

## **2.9 Reference Period :**

The reference period means the period of time for which data on consumption was collected. During 55<sup>th</sup> round of NSS, information on consumption of food, pan, tobacco and intoxicants were collected for last 30 days and the last 7 days from the same households. For items of clothing, footwear, durable goods, education and medical (institutional) expenses, information were collected for last 365 days preceding the date of survey. However, the monthly estimates presented in this report were based on data collected for "last 365 days" for clothing , footwear, durable goods, education and medical (institutional) expenses and for "last 30 days" for the rest of the items.

## **2.10 Enterprise :**

An enterprise is an undertaking which is engaged in the production and / or distribution of some goods and / or services meant mainly for the purpose of sale, whether fully or partly. An enterprise may be owned and operated by a single household or by several households jointly, or by an institutional body.

## **2.11 Own Account Enterprise (OAE) :**

An own account enterprise is an undertaking run by household labour, usually without any hired worker employed on a 'fairly regular basis' . Fairly regular basis means the major part of the period of operations of the enterprise during last 365 days.

## **2.12 Establishment :**

Those enterprises, which have got at least one hired worker on 'fairly regular basis' are called establishments.

## **2.13 Proprietary Enterprises :**

Proprietary enterprises are those where an individual is the sole owner of the enterprise.

## **2.14 Partnership Enterprises :**

Partnership is defined as the relation between persons who have agreed to share the profits of a business carried on by all or any one of them acting for all. Partners may be from the same household or they may be from different households.

## **2.15 Seasonal Enterprises :**

Seasonal enterprises are those, which are usually run in a particular season or fixed months of year.

## **2.16 Non-Agricultural enterprise :**

All enterprises covered under Tabulation Categories 'A' and 'B' of the National Industrial Classification, NIC-1998 are "agricultural enterprises" while the others covered Tabulation Categories 'C' to 'Q' are "non-agricultural enterprises". However, in the 55<sup>th</sup> round the enterprises falling under tabulation categories 'D' to 'O' (except 'E' and 'L') have been covered. Hence, the non-agricultural enterprises belonging to mining and quarrying, electricity, gas and water, public administration and defence, compulsory social security, private

households with employed persons and extra territorial organization and bodies have not been covered in this survey.

**2.17 Worker :**

A worker is defined as one who participates either full time or part time in the activity of the enterprise. The worker may serve the enterprise in any capacity either primary or supervisory and may or may not receive wages/salaries in return of work incidental to or connected with the entrepreneurial activity.

**2.18 Hired Worker :**

A hired worker is a person employed directly or through any agency on payment of regular wage/salary in cash or kind. Apprentices, paid or unpaid are treated as hired workers. Paid household workers, servants and resident workers of the enterprise are also considered as hired workers.

**2.19 Mixed Activity ;**

In an enterprise, number of activities are carried out simultaneously. If the information on each activity is separately available then each activity is treated as a separate enterprise and if the accounts are not separable for each such activity, the enterprise will be classified as having mixed activities. For example, a doctor may have a medical shop attached to his dispensary, the appropriate NIC in such cases is determined on the basis of major activity. The criteria for major activity refers to the activity which yields maximum income / turnover / employment.

**2.20 Economic Activity :**

Any activity resulting in production of goods and services that add value to national product is considered as an economic activity. Such activities include production of all goods and services for market, i.e. production for pay or profit and the production of primary commodities for own consumption and own account production of fixed assets, among the non-market activities.

## 2.21 Activity status :

It is the activity situation in which a person is found during a reference period with regard to the person's participation in economic and non-economic activities. According to this, a person could be in one or a combination of the following three broad activity statuses during a reference period:

- (i) Working or being engaged in economic activity (work) as defined above,
- (ii) being not engaged in economic activity (work) but either making tangible efforts to seek 'work' or 'being available for work', and
- (iii) being not engaged in any economic activity (work) and also neither seeking nor available for 'work'.

Broad activity status mentioned in (i) and (ii) above are associated with 'being in labour force' and mentioned in (iii) with 'not being in the labour force'. Within the labour force, broad activity status (i) and (ii) are associated with 'employment', and 'unemployment' respectively.

- (i) situation of working or being engaged in economic activities (employed)
  - (a) worked in household enterprise (self-employed) as own account worker (11);
  - (b) worked in household enterprise (self-employed) as employer (12)
  - (c) worked as helper in household enterprise (unpaid family worker) (21);
  - (d) worked as regular salaried/wage employee (31);
  - (e) worked as casual wage labour in public works (41) and in other types of work (51);
  - (f) had work in household enterprise but did not work due to (i) sickness (61), (ii) other reasons (62); and
  - (g) had regular salaried/wage employment but did not work due to (i) sickness (71), (ii) other reasons (72);
- (ii) situation of being not engaged in work but seeking or available for work(unemployed) (a) sought work (81) and (b) did not seek but was available for work (82)

- (iii) situation of being not available for work (not in labour force):
  - (a) attended educational institutions (91);
  - (b) attended domestic duties only (92);
  - (c) attended domestic duties and was also engaged in free collection of goods (vegetables, roots, firewood, cattle-feed etc.), sewing, tailoring, weaving etc. for household use (93);
  - (d) rentiers, pensioners, remittance recipient etc. (94);
  - (e) not able to work due to disability (95);
  - (f) beggars, prostitutes (96);
  - (g) others (97) and
  - (h) did not work due to sickness (for casual workers only) (98).

#### **2.22 Workers (or employed) :**

Persons who are engaged in any economic activity or who despite their attachment to economic activity, abstain from work for reason of illness, injury or other physical disability, bad weather, festivals, social or religious functions or other contingencies necessitating temporary absence from work, constitute workers. Unpaid helpers who assist in the operation of an economic activity in the household farm or non-farm activities are also considered as workers. All the workers are assigned one of the detailed activity status under the broad activity category 'working' or 'being engaged in economic activity' (or employed).

#### **2.23 Seeking or available for work (or unemployed) :**

Persons who could not work owing to lack of work, but either sought work through employment exchanges, intermediaries, friends or relatives or by making applications to prospective employers or expressed their willingness or availability for work under the prevailing conditions of work and remuneration are considered as 'seeking or available for work' (or unemployed).

#### **2.24 Self-employed :**

Persons who operate their own farm or non-farm enterprises or are engaged independently in a profession or trade or own-account or with one or a few partners are deemed to be self-employed in household enterprises. The essential feature of the self-employed is that they have autonomy (i.e. how,

where and when to produce) and economic independence (i.e., market, scale of operation and money) for carrying out their operation. The fee or remuneration received by them comprises two parts – share of their labour and profit of the enterprise. In other words, their remuneration is determined wholly or mainly by sales or profits of the goods or service which are produced.

#### **2.25 Usual activity status :**

The usual activity status relates to the activity status of a person during the reference period of 365 days preceding the date of survey. The activity status on which a person spends relatively longer time (i.e. major time criterion) during 365 days preceding the date of survey is considered as the principal usual activity status of the person. To decide the principal usual activity of a person, he/she is first categorised as belonging to the labour force or not during the reference period on the basis of major time criterion. Persons thus adjudged as not belonging to the labour force are assigned the broad activity status 'neither working nor available for work'. For persons belonging to the labour force, the broad activity status of either 'working' or 'not working but seeking and/or available for work' is ascertained based on the same criterion viz. relatively longer time spent in accordance with either of the two broad status within the labour force during 365 days preceding the data of survey. Within the broad activity status so determined, the detailed activity status of a person pursuing more than one such activity is determined once again on the basis of the relatively longer time spent on such activities. In terms of activity codes, codes 11-51 are applicable for persons classified as workers, while code 81 is assigned to people either seeking applicable for persons classified as workers, while code 82 as assigned to people either seeking or available for work (unemployed persons) and codes 91-97 for those who are out of labour force.

#### **2.26 Subsidiary economic activity status :**

Subsidiary economic activity status is determined on the basis of the major time criterion may be pursuing some economic activity for a relatively shorter time during the reference period of 365 days preceding the date of survey. The status in which such economic activity pursued is the subsidiary economic

activity status of that persons. Thus, activity status codes 11-51 only are applicable for persons reporting some subsidiary economic activity. It may be noted that engagement in work in subsidiary capacity could arise out of the following two situations, viz.,

- (i) a person could be engaged for a relatively longer period during last 365 days in one economic/non-economic activity and for a relatively shorter period in another economic activity, and
- (ii) a person could be pursuing one economic activity/non-economic activity almost throughout the year in the principal usual activity status and simultaneously pursue another economic activity for a relatively shorter period in a subsidiary capacity.

## **Chapter- 3**

### **Sample Design and Estimation Procedure**

#### **3.1 Sample Design :**

A stratified multi-stage sampling design was adopted for selection of the sample First Stage Unit (FSU). The FSUs are villages for rural areas and Urban Frame Survey (UFS) blocks for urban areas. Finally, the selected units are enterprises for schedule 2.0 and households for schedule 1.0 and 10, by method of circular systematic sampling from the corresponding frame. Large FSUs are divided into hamlet groups in rural areas and sub-blocks in urban areas, which are grouped into two segments and sample is selected independently from each segment.

#### **3.2 Sampling Frame :**

For rural areas, the list of villages according to Population Census – 1991 and for urban areas, the latest available list of Urban Frame Survey blocks were used for selection of sample FSUs. All households (including temporarily locked) and non-agricultural enterprises were listed. And only the informal non-agricultural enterprises (excluding ASI, Mining and Quarrying, electricity, gas and water supply) which were operated at least for 30 days (15 days for seasonal enterprises) during last year qualify for survey referred to as ‘Eligible Enterprises’.

#### **3.3 Stratification :**

The Gujarat State was divided into five regions viz., 1) Eastern region, 2) Northern Plains, 3) Southern Plains, 4) Dry areas and 5) Saurashtra region. Each district within the NSS region was divided into two areas; viz., in rural and urban sector. In each sector having maximum concentration of non-agricultural enterprises was selected for listing of households/enterprises, which was referred to segment 1. From the remaining (excluding segment 1) hamlet group / sub-blocks of the FSU, two or more hamlet groups / sub-blocks were selected circular systematically and these 2 groups together known as Segment 2. (see Appendix-4)

### **3.4 Stratification of Household :**

All households listed were stratified into two second stage strata viz., Affluent households forming SSS – 1 and the rest SSS – 2. In rural sector, household having certain items namely motor car / jeep , colour TV, telephone etc. or owns land / livestock beyond certain limit was classified as ‘**Affluent**’ . In urban sector, household having MPCE (Monthly Per Capita Consumer Expenditure) greater than certain limit of a town/city in which household located referred to as SSS – 1 and rest as SSS-2.

### **3.5 Stratification of enterprise :**

All the eligible enterprises in a segment for both sector (Rural and Urban) were stratified into 12 strata., which consists in combination of six broad industry group and two enterprise class. The enterprises were classified into two classes. In an enterprise if entrepreneurial activity carried out with no hired worker during major part of period of operation during the last year was referred to as ‘**Own Account Enterprise**’ , class-1 and rest as class- 2. An enterprise belongs any of six broad industry groups viz., Manufacturing -1, construction -2, Trade and Repair services -3, Hotels and Restaurants- 4, Transport, Storage and Communication -5 and other service sector -6.

### **3.6 Formation of stratum :**

In Rural sector two special strata were formed at State level viz., stratum 1 and stratum 2. All FSUs having population between 1 to 100 and FSUs having population more than 15000 were allocated Startum 1 and stratum 2 respectively. In urban sector the sample size were first allocated among three classes of towns in proportion to population, viz. 1) population less than 50000 ,2) population between 50000 and less than 10 lakhs and 3) population having more than 10 lakhs) . Again within NSS region sample allocated between two strata, namely 1) Hospital Area/Industrial Area/ and Bazar area blocks and 2) the rest in proportion to total number of FSUs in the respective frames with double weightage given to the first category of blocks.

### **3.7 General Procedure for selection of Households / Enterprises :**

The sample households/enterprises were selected from the respective frames by **circular systematic sampling with equal probability**. For the

purpose of systematic sampling households in the frame of Second Stage Stratum two were arranged by means of livelihood and land possessed classes for rural sector and by means of livelihood and by MPCE classes for urban sector. Enterprises under each stratum (i.e. segment, broad industry group and enterprise class) were arranged in the ascending order of NIC-2 digit codes ( 3-digit codes for Hotel and Restaurants) before sampling. The total All India sample size for rural and urban sector combined was 10384 FSU for central sample. The total sample size for Gujarat State Sample (Rural and Urban) were 440 FSU.

### 3.8 Estimation Procedure :

The following notations were used in this section

$D$  = number of hamlet groups / sub-blocks formed in FSU

$s$  = subscript for the s-th segment of sample village / block ( $s = 1 \& 2$ )

$g$  = subscript for the g-th broad group of industry ( $g = 1$  to  $6$ )

$t$  = subscript for the t-th enterprise class ( $t = 1 \& 2$ )

$Z$  = Total of sizes in the sampling frame for the stratum

$z$  = Size used for selection of an FSU from sampling frame

$H$  = Total number of households listed in a village / block

$h$  = Number of household surveyed and used for tabulation

$k$  = subscript for the  $k^{\text{th}}$  sample enterprise

$E$  = total number of enterprises listed in appropriate frame

$e$  = number of enterprises surveyed and used for tabulation

$n$  = number of sample village/blocks surveyed within a stratum and sub sample (including uninhabited and zero cases and excluding casualty and not reported cases and used for tabulation)

$\hat{Y}$  = estimate of population total of character  $Y$

$y$  = value of any character under estimation in a sample village / block /enterprise / household

For estimating the number of households of SSS following formula applied:  
For Schedule 0.1/0.2

Rural :

$$\hat{Y} = \frac{Z}{n} \sum_{f=1}^n \frac{1}{z_f} \sum_{s=1}^2 B_{fsc}$$

Urban :

$$\hat{Y} = \frac{Z}{n} \sum_{f=1}^n \sum_{z_f}^2 B_{fsc}$$

Here  $B_{fsc} = \frac{H_{fsc}}{h_{fsc}}$  for segment 1 (s=1) and

$$B_{fsc} = \frac{Df-1}{2} \times \frac{H_{fsc}}{h_{fsc}} \text{ for segment 12(s=2) and}$$

Schedule 1.0/10 :

Rural :

$$\hat{Y} = \frac{Z}{n} \sum_{f=1}^n \frac{1}{z_f} \sum_{s=1}^2 B_{fsc} \sum_{j=1}^{hfsc} y_{fscj}$$

Urban :

$$\hat{Y} = \frac{Z}{n} \sum_{f=1}^n \sum_{z_f}^2 B_{fsc} \sum_{j=1}^{hfsc} y_{fscj}$$

**Schedule 2.0**

For estimating characteristic of enterprises for a stratum of a sub-sample replicate from the selection frame based on broad group of industry ( $g$ ) × enterprise class ( $t$ ).

Rural :

$$\hat{Y} = \frac{Z}{n} \sum_{f=1}^n \frac{1}{z_f} \sum_{s=1}^2 B_{fsgt} \sum_{k=1}^{efsgt} y_{fsgtk}$$

Urban :

$$\hat{Y} = \frac{Z}{n} \sum_{f=1}^n \sum_{s=1}^2 B_{fsgt} \sum_{k=1}^{efsgt} y_{fsgtk}$$

## Chapter 4 Survey Findings

### (A) Household Consumer Expenditure

This report presents results of household consumer expenditure based on survey of NSS 55<sup>th</sup> round. The important measurement for living standard is consumer expenditure incurred in reference period and the same is compared to other socio-economic sector. The Monthly Per Capita Consumer Expenditure (MPCE) is the outcome of the survey. The distribution of population among different MPCE class , average MPCE and its break-up at All-India and State level are presented herewith. The number of sample villages / Urban blocks, number of households and number of persons surveyed in State sample and All-India level are shown in the table given below :

**Table 1 : Number of sample villages, blocks, household surveyed**

State	No of Villages		No. of Blocks		No.of HHs surveyed		No .of Persons Surveyed	
	Allotted	Surveyed	Allotted	Surveyed	Rural	Urban	Rural	Urban
<b>Gujarat</b>	208	208	232	232	2482	2752	12719	12800
<b>All-India</b>	6208	6046	4176	4116	71385	48924	374856	225160

It shows that 5234 households and 25519 persons were surveyed in rural and urban areas in 440 sample villages/urban blocks in Gujarat state as a state sample.

### Distribution of Population by MPCE Class :

The distribution of persons by average MPCE for rural and urban sector is depicted below.

**Table 2 : Per 1000 distribution of population by MPCE Class**  
[RURAL MPCE in Rs.]

MPCE LEVEL	MPCE CLASS (Rs.)	NO. OF PERSONS PER 1000	PERCENT	CUMMULATIVE PERCENT	AVERAGE MPCE (Rs.)
1	< 225	9	0.9	0.9	201
2	225 - 255	12	1.2	2.1	243
3	255 - 300	42	4.2	6.3	281
4	300 - 340	72	7.2	13.5	322
5	340 - 380	90	9.0	22.5	361
6	380 - 420	93	9.3	31.8	399
7	420 - 470	137	13.7	45.5	445
8	470 - 525	102	10.2	55.7	500
9	525 - 615	141	14.1	69.8	566
10	615 - 775	167	16.7	86.5	686
11	775 - 950	77	7.7	94.2	846
12	950 & Above	58	5.8	100.0	1214
	All Class State Avg. MPCE	1000	100		<b>586</b> <b>683</b>

**Table 3 : Per 1000 distribution of population by MPCE class**  
[URBAN MPCE in Rs.]

MPCE LEVEL	MPCE CLASS (Rs.)	NO. OF PERSONS PER 1000	PERCENT	CUMMULATIVE PERCENT	AVERAGE MPCE (Rs.)
1	< 300	17	1.7	1.7	238
2	300 - 350	22	2.2	3.9	327
3	350 - 425	65	6.5	10.4	393
4	425 - 500	26	2.6	13.0	436
5	500 - 575	164	16.4	29.4	511
6	575 - 665	133	13.3	42.7	621
7	665 - 775	142	14.2	56.9	719
8	775 - 915	109	10.9	67.8	840
9	915 - 1120	133	13.3	81.1	1010
10	1120 - 1500	106	10.6	91.7	1274
11	1500 - 1925	56	5.6	97.3	1681
12	1925 & +	27	2.7	100.0	2476
	All Class State Avg. MPCE	1000	100.0		<b>901</b> <b>683</b>

The rural population is highly concentrated in lower level MPCE class as compared to urban sector. Average MPCE in rural sector is **586** and the population counts below average MPCE is about 56%, while in case of urban sector average MPCE is **901** and the population counts below average MPCE is about 57%. At All-India level Average MPCE for rural and urban sector is **486** and **855** respectively. In both the sector state average MPCE is higher than All-India level. It shows average living standard of people of Gujarat State is comparatively better than that of All-India level.

The break of MPCE by broad groups of households in rural and urban sector given below shows that in Rural sector , at All-India and Gujarat state level , MPCE for Agricultural Labour households was least among different household, while in Urban sector , MPCE for Casual Labour households was least among different households. MPCE for all households type found higher in the State than that of All-India level.

**Table 4 : Average MPCE by Household Type**

[MPCE in Rs.]

Household Type	Average MPCE(G)	All-India Level
<b>Rural :</b>	<b>586</b>	<b>486</b>
SELF EMPLOYED IN NON AGRI.	649	502
AGRICULTURAL LABOUR	489	386
OTHER LABOUR	542	483
SELF EMPLOYED IN AGRI.	664	520
OTHERS	716	652

Household Type	Average MPCE(G)	All-India Level
<b>Urban :</b>	<b>901</b>	<b>855</b>
SELF EMPLOYED	949	813
REG. WAGE/SALARY EARNING	1027	981
CASUAL LABOUR	647	541
OTHERS	789	1031

The break of MPCE by Social Groups of households in rural and urban sector given below shows that in Rural sector, at All-India and Gujarat state level , MPCE for Scheduled Tribe households was least among different household, while in Urban sector , MPCE for Scheduled Caste households at All-India and Scheduled Tribe

households in Gujarat State was least among different households. MPCE for all social group households type in State found higher than that of at All-India level except for social Group 'Others' in Urban sector which is shown in Table – 5.

**Tbale 5 : Average MPCE by Social Group**

[MPCE in

Rs.]

<b>Social Group</b>	<b>Average MPCE</b>	<b>All-India Level</b>
<b>Rural:</b>	<b>586</b>	<b>486</b>
Scheduled Tribe	464	388
Scheduled Caste	521	419
Other Backward Class	558	474
Others	685	577
<b>Urban</b>	<b>901</b>	<b>855</b>
Scheduled Tribe	730	691
Scheduled Caste	761	609
Other Backward Class	734	735
Others	973	1005

**Region wise Classification of MPCE :**

The Gujarat state is divided into Five Regions for NSS survey. The districts covered under regions are shown in Appendix - 4. The region wise rural, urban and state as a whole average MPCE is mentioned in Table -6.

**Table 6 : Region wise Classification of MPCE :**

[MPCE in

Rs.]

<b>Sr.</b>	<b>Regions</b>	<b>Average MPCE Rural</b>	<b>Average MPCE Urban</b>	<b>Average MPCE State</b>
1	Eastern Parts (071)	517	806	547
2	Plains Northern (072)	601	885	697
3	Plains Southern (073)	590	1033	784
4	Dry areas (074)	558	799	606
5	Saurashtra (075)	652	843	724
	<b>All Regions</b>	<b>586</b>	<b>901</b>	<b>683</b>

The above table shows that in all regions in rural areas of Gujarat state, have lower MPCE than State Average MPCE. It generally reveals that in rural sector households' income is low and hence expenditure is also low. In Plains Northern and Saurashtra regions of rural sector, peoples have higher MPCE as compared to other regions. One of the reason for low expenditure in rural sector may be low prices than urban area. In case of all regions in urban sector, have higher MPCE than State

average MPCE as well as rural areas Average MPCE . This difference is due to higher income of households in urban areas as compared to rural areas.

**Expenditure on food and non-food items :**

The break-up of total expenditure between food and non-food item in rural sector 61% counts for food and 39% for non-food, while that of in urban sector counts equally in both items. As shown in table given below, in urban sector percentage expenditure for non-food item is higher than that of rural sector, while in rural sector percentage expenditure for food item is higher than that of urban sector,

**Table 7 : Composition of food and Non-food expenditure :**

Sector / Region	Percentage			Expenditure (Rs.)		
	Food	Non-Food	Total	Food	Non-Food	Total
<b>Rural</b>	<b>60.82</b>	<b>39.18</b>	<b>100.00</b>	<b>356.15</b>	<b>229.42</b>	<b>585.57</b>
Eastern Parts (071)	60.02	39.98	100.00	310.40	206.72	517.12
Plains Northern (072)	61.01	38.99	100.00	366.48	234.17	600.65
Plains Southern (073)	58.33	41.67	100.00	343.95	245.71	589.67
Dry areas (074)	64.27	35.73	100.00	358.58	199.34	557.92
Saurashtra (075)	60.94	39.06	100.00	397.31	254.62	651.93
<b>Urban</b>	<b>50.20</b>	<b>49.80</b>	<b>100.00</b>	<b>452.19</b>	<b>448.58</b>	<b>900.77</b>
Eastern Parts (071)	52.41	47.59	100.00	422.17	383.38	805.56
Plains Northern (072)	50.12	49.88	100.00	443.46	441.42	884.88
Plains Southern (073)	46.22	53.78	100.00	477.35	555.35	1032.70
Dry areas (074)	56.79	43.21	100.00	453.84	345.37	799.21
Saurashtra (075)	52.73	47.27	100.00	444.64	398.62	843.26

**Other findings:**

During the 55<sup>th</sup> round, state had surveyed **5234** total number of households, out of this **2482** belongs to rural and **2752** belongs to urban areas. From these households, information for **25519** persons was collected, out of which **12719** and **12800** were belonging to rural and urban sector respectively. On this basis total **87.30** lakhs families were estimated, out of which **60.29** lakhs and **27.01** lakhs families were residing in rural and urban areas respectively.

According to the social group of household, 17% families were belonging to Scheduled Tribe and 9% belonging to Scheduled caste families and remaining 74% families belongs to other social groups. This social group classification for rural and urban reveals that in rural areas other social group's ratio is 66% while in urban it is 89% and at all India level other social group's ratio is 69% in rural and 92% in urban.

For all households under survey, information regarding primary source of energy for cooking and lighting were collected. The main source of energy for cooking was firewood and chips in rural areas counts to 85% of families, while in urban areas LPG counts 59% and Kerosene, Coak and Coal, firewoods and chips counts 32% of families. In case of primary source of energy used for lighting was mainly electricity counts 86%. However, in rural area 22% households were using kerosene for lighting.

## **(B) Informal Non-Agricultural Enterprises**

The present survey is first ever nation wide integrated survey of households and non-agricultural enterprises in the informal sector. The concept of informal sector characterised as consisting of units engaged in the production of goods and/or services with primary objective of generating employment and income. These units typically operate at low level of organization, with little or no division between labour and capital as factors of production and on a small scale. The employer and employee relations are based on casual employment or personal or social relations rather than contractual arrangements with formal guarantees. The owners of these units have to raise the necessary finance at their own risk and are personally liable, without limit for any debts or obligation incurred in the production process. The capital goods such as building or vehicles used for both the business and household purpose without discrimination and belongs to the owners. The informal sector is regarded as a group of production units, which form part of the household sector as household enterprises and unincorporated enterprises owned by households. Within the household sector, the informal own account enterprises and informal employers, however, the enterprises covered under Annual survey of Industries were out of the coverage for unorganised sector survey. The survey findings on the basis of schedule of enquiry 2.0 and related information on estimated number of enterprises, workers, value added and other characteristics of the enterprises is presented herewith.

The Gujarat state sample results are based on data collected during the NSS 55<sup>th</sup> round survey from July-1999 to June-2000 covering sample of 208 villages and 232 urban blocks, while 6046 sample villages and 4124 urban blocks at All-India level .

### Enterprises Surveyed :

The information on the number of enterprises surveyed by type of enterprise (OAE and Establishment) for rural, urban and combined is given in table – 1. A total number of 8161 enterprises surveyed in the State, out of them 3688 (nearly 45%) were from rural sector and 4473 (nearly 55%) were from urban sector. Also out of total 8161 number of enterprises, 6852 (84%) were OAEs and 1309 (16%) were Establishments in rural and urban areas. Out of 3688 rural sample 3420 (93%) were OAEs and 268 (7%) were Establishments. In urban sector out of 4473 sample 3432 (77%) were OAEs and 1041 (23%) were Establishments.

**Table 1 : Number of Sample Enterprises :**

	Rural			Urban			Combined		
	OAE	EST	ALL	OAE	EST	ALL	OAE	EST	ALL
Gujarat	3420	268	3688	3432	1041	4473	6852	1309	8161
All-India	102122	12384	114506	60851	22280	83131	162973	34664	197637

Further, the estimated number of enterprises by type of enterprises viz. OAE and Establishment, separately for rural, urban and combined are depicted in Table-2. At State level, total number of non-agricultural enterprises has been estimated as 16.36 lakhs. Out of these 5.54 lakhs (34%) are located in rural sector and 10.82 lakhs (66%) are located in urban sector. Also majority of enterprises belong to tabulation category Manufacturing and Trading and Repair contributing 26% and 54% respectively.

**Table -2 : Estimated Number of Enterprises by type of enterprises and sectors**

#### Sector : Combined

Broad Industry Group	O.A.E.	Establishments	TOTAL
1. Manufacturing	320071	101735	421805
2. Construction	13352	2344	15696

**Estimated workers :** At State level the total number of non-agricultural workers has been estimated at 35.09 lakhs, of them 8.55 lakhs (24%) workers were working in enterprises located in rural sector and 26.54 lakhs (76%) workers were working in enterprises located in urban sector. Out of total 35.09 lakhs workers 54% were working in OAEs enterprises and 46% in Establishments enterprises. Also majority of workers belong to tabulation category Manufacturing and Trading and Repair which contributing 31% and 52% respectively.

**Table – 3 : Estimated Number of Workers**

<b>Combined</b>	<b>O.A.E.</b>	<b>OTHERS</b>	<b>TOTAL</b>

**Value Added Per Worker :** The value added per worker per annum for rural, urban and combined for all category is depicted in Table – 4. As per schedule of enquiry, information was collected for all enterprises for reference month and annual value added derived by multiplying the related data by 12 in case of casual and perennial enterprises and by number of months operated for seasonal enterprises by product method. At State level, annual value added per worker is estimated at Rs. 37607 , while for All-India level it stands at Rs. 24242 . The value added per worker for OAEs is Rs. 33616 and for establishments is Rs. 42225. For all broad industry group combined, the value added per worker for state in rural areas is 58% of the value added per worker in the urban areas, while for All-India it is estimated at 45%. In

urban and rural sector the highest value added per worker is for Construction services. The lowest value added per worker in urban sector is Hotel and Restaurant services while in rural sector lowest value added per worker is Manufacturing services.

The information regarding other important characteristics viz. maintenance of accounts, status of registration, working on contract, type of ownership, location of enterprise, nature of operation, problem faced in operation, other economic activities undertaken, and growth status of the enterprise over the last three years etc. were collected for each surveyed enterprise and the related tables are presented in Appendix-4.

## ( C ) Employment and Unemployment

The present survey is the sixth quinquennial survey on the situation of Employment and Unemployment at All-India level in terms of Central Sample as well as for State sample at State level during the period 1<sup>st</sup>, July 1999 to 30<sup>th</sup>, June 2000 and it was carried out as a part of 55<sup>th</sup> round by National Sample Survey Organisation. In this survey, information on various aspects of employment and unemployment at national and state level was collected through a schedule of enquiry viz. schedule 10.

This report presents State Sample results of Employment and Un-employment based on 55<sup>th</sup> round survey of National Sample Survey. Sample size for the whole round was allocated equally among four sub-rounds. For each sub-round two independent sub-samples were selected and hence there were eight sub-samples in the round. In each of eight sub-samples, from each selected villages in rural and blocks in urban areas, a sample of 12 households were surveyed. The number of sample villages / urban blocks, number of households and number of persons surveyed in State sample and at All-India level are shown in below Table-1. The detail of sample design and estimation procedure is fully described in the chapter of Sample Design and Estimation Procedure.

**Table 1 : Number of sample villages, blocks, households surveyed :**

State	No of Villages		No. of Blocks		No.of HHs surveyed		No .of Persons Surveyed	
	Allotted	Surveyed	Allotted	Surveyed	Rural	Urban	Rural	Urban
<b>Gujarat</b>	208	208	232	232	2482	2753	12597	12738
<b>All-India</b>	6208	6048	4176	4125	71417	49161	371188	225500

The estimates of employment and unemployment derived after making detail questionnaire about the activity status of the members of households selected. The persons surveyed were classified into various activity categories on the basis of the activities undertaken by them during reference period viz., one year, one week and each day of the reference week. These activities are termed as usual status, current weekly status and the current daily status respectively.

The usual activity status relates to the activity of a person during the reference period of 365 days preceding the date of survey. The activity status on which a person spent relatively longer time during 365 days preceding the date of survey is considered as the principal usual activity status of the person with regard to participation in economic and non-economic activities. According to this criteria a person can be classified in one or more of activity statuses

- (i) working or being engaged in economic activity (work)
- (ii) being not engaged in economic activity but either making tangible efforts to seek work or being available for work if the work is available and
- (iii) being not engaged in any activity and also not available for work

If a person falls under activity status (i) and (ii) is first to be categorized as belonging to labour force or being in labour force and if a person falls under activity status (iii) be adjudged as not belonging to the labour force. Further, within the labour force, broad activity status (i) and (ii) are considered as “Employment” and “Unemployment” respectively.

#### **Labour Force :**

Labour is one of the important factor of production. Hence to give a firm and conceptual frame work for conducting such surveys Planning commission had set up an expert committee on unemployment estimates known as Dantwala Committee, to derive the concepts, definitions and indicators for employment and unemployment. On the basis of recommendation of committee the quinquennial survey on Employment and Unemployment conducted by NSSO to collect information on situation of Employment and Unemployment in India. Labour force means economically active population which refers to supply or seek to supply of labour for production of goods and/or services. For the purpose of measurement of labour force participation three measures for classification of population are used namely usual status, current weekly status and current daily status. Under usual status classification labour includes (i) persons who had, for a relatively longer part of the year, either worked or were looking for work and (ii) persons other than first category who had worked at least for some time with some sort of regularity. And hence two sets of status are determined viz. principal status and subsidiary status and two set of estimates can be derived one based on principal status and other for principal and subsidiary statuses.

The labour force participation rate (LFPR) is defined as the number of persons in the labour force per 1000 persons. The LFPR as estimated from State Sample Survey , based on different concepts are presented for Gujarat state in table-1 given below :

**Table : 1 : Number of persons in the labour force per 1000 (LFPR) according to Usual Status for the age Group 5 - 60+**

Sector	Male		Female		Sex-Ratio	
	Usual status		Usual status		Usual status	
	ps	Ps+ss	Ps	ps+ss	ps	Ps+ss
Rural	642	661	285	297	398	420
Urban	594	597	88	91	128	132

In the year 1999 - 2000, considering 'all' workers, about 66 percent males and 30 percent females in rural areas were 'usually' available for employment. The corresponding proportions for urban areas were 60 and 9.1 percent respectively.

Sex ratio of labour force : The table-1 presents the sex ratio of the labour force, i.e. number of females per 1000 males in labour force. In both approach females were far behind by males in labour force, to a greater extent in urban areas than in rural areas. In case of usual status 'all workers' , females were relatively more frequent in the labour force. This was more so in rural areas than in urban areas. It is concluded from the table that females being engaged in subsidiary economic activities was more frequently observed in rural areas than in urban areas.

Following table-2 shows the number of persons in the labour force per 1000 persons of age 15 years and above :

**Table : 2 : Number of persons in the labour force per 1000 persons (LFPR) according to Usual Status for persons of age 15 years and above :**

Sector	Male		Female		Person	
	Usual status		Usual status		Usual status	
	Ps	Ps+ss	Ps	ps+ss	Ps	Ps+ss
Rural	864 (846)	878 (855)	391 (355)	382 (457)	645 (602)	637 (657)
Urban	780 (782)	782 (787)	109 (179)	112 (209)	461 (493)	462 (510)

Figures in bracket indicate the LFPR for All-India

The Labour Force Participation Rates for different age-groups as estimated from the State sample for 55<sup>th</sup> round surveys are provided. The rates are based on usual status 'all' approach which includes both the principal and subsidiary statuses.

Following table-3 shows the Age specific labour force participation rates (ASLFPR) in rural and urban areas by male and female.

**Table : 3 :Age specific labour force participation rates (ASLFPR) :**

Age Group	Rural		Urban	
	Male	Female	Male	Female
5-14	54	42	18	6
15-24	761	390	540	97
25-34	984	441	969	134
35-44	988	446	985	136
45-54	971	380	935	122
55-59	899	316	876	105
60+	585	118	362	43
<b>Total</b>	<b>661</b>	<b>297</b>	<b>597</b>	<b>91</b>

It is seen that LFPR pattern in the age-groups 25 to 54 in rural and urban areas among male closely resembled, while for females LFPR patterns in the age-groups 25-54 in rural and urban areas are not resembled due to feature of females being engaged in subsidiary economic activities was more frequently seen in rural areas than in urban areas.

**Employed (Work force) :**

As mentioned earlier three approaches for estimate of workforce (or employed) used in classification of activity statuses of the person surveyed viz.,

1. number of persons usually employed in the principal status and all workers taking into account, the employed according to both principal and subsidiary statuses,
2. number of persons employed on an average in a week and
3. number of person – days employed per day on an average during the reference period of 7 days preceding the date of survey.

Following table-4 shows the number of persons employed per 1000 persons according to usual status in rural and urban areas by male and female.

**Table – 4: Number of persons employed per 1000 persons according to usual status :**

Category of Worker	Usually Employed								
	Rural			Urban			Combine		
	Male	Female	Person	Male	Female	Person	Male	Female	Person
Ps	622 (522)	285 (231)	465 (380)	580 (513)	84 (117)	350 (324)	608 (520)	221 (203)	429 (365)
Ss	36 (9)	12 (68)	19 (37)	2 (5)	3 (22)	3 (13)	28 (7)	16 (56)	16 (32)
All	658 (531)	297 (299)	484 (417)	582 (518)	87 (139)	353 (337)	636 (527)	237 (259)	445 (397)

Figures in brackets indicate for All-India

Of the three estimates mentioned above the first one approach provides the estimate for 'usually employed' or the 'usual status work-force' for two categories viz. (i) working in the principal status (ps workers) more or less stable employment and (ii) working in subsidiary status (ss workers). Total of both category counts the totally usually employed i.e. all workers. WPR is 48% in rural sector while 35% in urban sector and in combine 45%. In rural sector for both legend WPR is higher than in urban sector.

#### **Unemployed :**

Unemployment rate is defined as the number of persons per thousand persons in the labour force i.e. the idle or unutilized portion of labour force. And this will be more precise indicator of the unemployment situation than the proportion unemployed, which indicate the number of the unemployed per thousand persons in the population as a whole.

As in the case of workforce (or employed) and also for unemployed, three type of estimates used in classification of activity statuses of the person surveyed viz.,

1. number of persons usually employed in the principal status and all workers taking into account, the employed according to both principal and subsidiary statuses,
2. number of persons employed on an average in a week and
3. number of person – days employed per day on an average during the reference period of 7 days preceding the date of survey.

As per above definition unemployment rates observed during survey period is presented in following Table – 5, which indicate that overall unemployment rates are not high. The unemployment rates are higher in urban areas than in rural areas.

**Table – 5: Unemployment Rates according to Usual Status (Age Group – 5 to 60+)**

Category of Worker	Unemployment rates					
	Rural			Urban		
	Male	Female	Person	Male	Female	Person

## Appendix - 4

LIST OF NSS REGION AND THEIR COMPOSITION - GUJARAT STATE			
SR. (1)	NSS REGION (2)	DISTRICT (3)	TALUKA (4)
1	EASTERN (071)	SABAR-KHANTHA (09)	KHEDBRHMA, VIJAYNAGAR, BHILODA, MEGHRAJ.
		PANCHMAHALS (14)	LIMKHEDA, DOHAD, JHALOD, SANTRAMPUR.
		VADODARA (15)	NASVADI, TILAKWADA, CHHOTA UDAIPUR, JETPUR PAVI.
		BHARUCH (16)	ANKLESVAR, VALIA, DEDIA PADA, SAGBARA, NANDOD.
		SURAT (17)	VYARA, MAHUVA, VALOD, NIZAR, SONGADH, MANDVI, UCHCHHAL, MANGROL, BARDOLI, PALSANA.
		VALSAD (18)	CHIKHILI, DHARAMPUR, BANSADA, PARDI UMBERGAON, VALSAD.
		THE DANGS (19)	WHOLE DISTRICT
2	PLAINS NORTHERN (072)	SABAR-KHANTHA (09)	PRANTIJ, MODASA, MALPUR, IDAR, BAYAD HIMATNAGAR.
		MAHESANA (10)	MAHESANA, KADI, PATAN, SIDHPUR, KALOL, KHARALU, VISNAGAR, VIJAPUR.
		GANDHINAGAR (11)	WHOLE DISTRICT
		AHMEDABAD (12)	WHOLE DISTRICT
		KHEDA (13)	WHOLE DISTRICT
3	PLAINS SOUTHERN (073)	PANCHMAHALS (14)	HALOL, GODHARA, SHEHERA, LUNAWADA DEVGADBARIA, JAMBUGHODA, KALOL.
		VADODARA (15)	VADODARA, SAVLI, DABHOI, KARJAN, PADRA, SINOR, VAGHODIA, SANKHEDA.
		BHARUCH (16)	HANSOT, VAGRA, AMOD, JAMBUSAR, BHARUCH, JHAGADIA.
		SURAT (17)	CHORASI, KAMREJ, OLPAD.
		VALSAD (18)	NAVSARI, GANDEVI.
4	DRY AREAS (074)	SURENDRANAGAR (03)	WHOLE DISTRICT
		KACHCHH (07)	WHOLE DISTRICT
		BANASKANTA (08)	WHOLE DISTRICT
		MAHESANA (10)	CHANASMA, SAMI, HARIJ.
5	SAURASHTRA (075)	JAMNAGAR (01) RAJKOT (02) AMRELI (05) BHAVNAGAR(04) JUNAGADH (06)	WHOLE DISTRICT
