GANDHINAGAR**

FOR OFFICIAL USE ONLY

TRAFFIC CENSUS RESULTS 2010

**Directorate of Economics & Statistics
Government of Gujarat
Gandhinagar**

-: P R E F A C E :-

Development of economy depends on basic infrastructure facilities which includes a good transport system. The objective of the Traffic Census Results is to assess the volume of mode of transport in the state. This calls for considering necessary strategies towards improvement of the existing road conditions including their extensions and also widening of the width of Carriage way of different roads.

The present publication is 32nd issue in the series. Data is analyzed on the basis of movement of different type of vehicles on road section having traffic with road carriage way widthwise, Passenger Car Unit wise at National Highways and State Highways in the State.

The Directorate gratefully acknowledges the co-operation extended by Roads and Building Department, Government of Gujarat for furnishing the basic traffic census data i.e. movement of different types of vehicles on road sections and traffic intensity on National Highways and State Highways.

I hope this publication will be useful to Planners, Policy Makers in their quest for development of the road system, Research Fellows and those who are interested in infrastructure Economic Development of the State.

The suggestions towards the improvement of this publication will be appreciated.

Gandhinagar

Traffic Census Results (TCR) on National Highways (NHs) and State Highways (SHs)-2010

1. Introduction:

- 1.1 The efficiency of transport depends on network of roads and transport system. Transport plays an important role in development of various important sectors of economy like industries, agriculture, commerce trade etc. Transport system links the producers with the consumers. The development of the economy depends heavily on a good transport system. The road transport system in general consists of animal driven vehicles as well as the power driven vehicles like scooters, mopeds, motor cycles, rickshaws and other three wheelers, cars, jeeps, trucks, buses etc.
- 1.2 Gross State Domestic Product (GSDP) and Net State Domestic Product (NSDP) at constant (2004-05) prices (Percentage Distribution) of 2010-11 indicates that the Industry Group "Transport, Storage & Communications" contributes 8.4% & 9.1% respectively of which "Transport by other means" contributes 4.0% and 4.2% respectively. The road network is an important constituent of the Transport sector.
- 1.3 The National Highways and State Highways Road Length was 3262 Km. & 18421 Km. respectively, out of Total Road Length of 77265 Km. as on 31-3-2010 in the State. This shows that National Highways & State Highways account 28.06 % of total roads as on 31-3-2010 in the State.
- 1.4 With a view to collect statistical information about traffic on National Highways and State Highways periodically, Roads and Buildings Department, Government of Gujarat conducts the Traffic Census in the State every year during the months of April and October at selected count posts on different road sections of the various categories of roads.

2. Objective :

2.1 The objective of the Traffic Census is to assess the volume of traffic on various road sections in the State. It also simultaneously provides useful data regarding composition of traffic intensity by type of roads in different areas of the State. The estimates of traffic intensity at various road sections provides a measure of adequacy of road carriage way width on those sections and also helps to identify the road sections need to be widen.

3. Methodology :

3.1 In order to conduct the Traffic Census, various count posts are set up at different points on various road sections of the State. The survey is conducted round the clock for seven days on the National Highways and for three days on the State Highways by the Roads and Buildings Department of the State. A complete count of all the vehicles which pass through the count posts in both the directions (up and down) during the survey is taken up. For the purpose of data collection, a day is divided into 3 shifts each of 8 hours. Different enumerators and supervisors of the Roads and Buildings Department are employed for different shifts for each direction on each count post. The information collected as above is received from the Roads and Building Department of the State for further processing. The scrutiny, coding, data entry and computerization of data and publishing Traffic Census Results (TCR) is carried out by the Directorate of Economics and Statistics. The details of functions and steps involved in preparation of Traffic Census Results is given in Annexure.

4. Coverage :

4.1 The data about the number of vehicles passing through the count post in either direction was collected at 61 count posts in

sections of the National Highways from 17 Executive Engineers of National Highways Authority and 795 count posts in April-2010 and 798 count posts in October-2010 round on different road sections of the State Highways from 25 Executive Engineers of the State Highways.

5. Reference Period :

The results furnished in this report are based on the Traffic Census conducted in the two rounds of the year-2010 i.e. during the months of April-2010 and October-2010.

6. The criteria for measuring the Road Category:

6.1 The following equivalent Private Car Units (PCUs) for converting the traffic of different type of vehicles into comparable common unit known as equivalent PCUs has been suggested by the Joint Technical Group for Transport Planning, constituted by the Planning Commission, New Delhi.

Recommended PCU Factors for Various Type of Vehicles

Sr. No.	Vehicle Category	Vehicle Sub Category	Vehicle Type	PCU Factor
1	Motorised Vehicle	Passenger Vehicle	Scooter/Motorcycle	0.50
2	Motorised Vehicle	Passenger Vehicle	Auto Rickshaw/Chhakda	1.00
3	Motorised Vehicle	Passenger Vehicle	Car/Jeep(Old Technology)	1.00
4	Motorised Vehicle	Passenger Vehicle	Car/Jeep(New Technology)	2.00
5	Motorised Vehicle	Passenger Vehicle	Mini Bus	3.00
6	Motorised Vehicle	Passenger Vehicle	Std. Bus	3.00
7	Motorised Vehicle	Goods Vehicle	Tempo /LCV	1.50
8	Motorised Vehicle	Goods Vehicle	2-XL Truck	3.00
9	Motorised Vehicle	Goods Vehicle	3- XL Truck	3.00
10	Motorised Vehicle	Goods Vehicle	M- XL Truck	4.50
11	Motorised Vehicle	Goods Vehicle	Tractor with Trailer	4.50
12	Motorised Vehicle	Goods Vehicle	Tractor without Trailer	1.50
13	Non-motorised vehicle	Good Vehicle	Animal Drawn	6.00

6.2 The above conversion factors have been used for converting the traffic of different types of vehicles into common equivalent Private Car Units (PCUs.). The bicycles and the vehicles other

than the vehicles mentioned above are not taken into account for arriving at traffic intensity in terms of PCUs.

- 6.3 The Joint Technical Group has also suggested the norms in equivalent Private Car Units (PCUs) per day for maximum traffic capacity for different road carriage way widths for the purpose of widening of roads under mixed traffic conditions and they are given as follows.

Guidelines for capacity of Roads and Rural Areas by the Indian Roads Congress (1990).

Sr. No.	Category of Road	Traffic capacity
1.	Single lane road	2000 PCUs
2.	Intermediate lane road	6000 PCUs
4.	Two lane road	15000 PCUs
3.	Four lane road	Above 35000 PCUs

7. Results:

- 7.1 The summarized distribution of the Count posts for the Traffic Census conducted during April and October-2010 rounds on National Highways and State Highways are given in Statement-1 and Statement-3 respectively. The details about the traffic intensity or traffic Volume observed on National Highwayes for road sections with traffic intensity or average daily traffic exceeding 10,000 PCUs per day either in April or in October or in both the rounds are given in Statement-2, while those on the State Highways for road sections having traffic intensity more than 7000 PCUs are given in Statement-4. The traffic intensity in terms of PCUs on various linked road sections of National Highways and State Highways are given in Appendix-1 and Appendix-2 respectively.

7.2 The information on traffic intensity can be meaningfully utilized in building efficient transport system. If the total traffic intensity of particular carriage way is relatively very high due too large movement of six wheelers like trucks, buses, etc. then there would be an urgent need to widen that carriage way.

8. Analysis of data of National Highways :

8.1 The information about the average traffic intensity per day in terms of equivalent private car units (PCUs) on the selected count post on various road section of National Highway is given in Appendix-I

8.2 The average traffic intensity or average daily traffic for all vehicles on National Highways in terms of PCUs per day is 37154 PCUs in April- 2010 round and 34846 PCUs in October- 2010 round, of which power driven vehicles observed at all the count posts PCUs per day is 36230 in April- 10 and 33906 PCUs per day in October- 10 round. The round wise distribution of the number of count posts on National Highways by road carriage way width and by traffic intensity or average daily traffic (PCUs) is shown in Statement-1.

8.3 The distribution of count posts on different road section by Road Carriage Way Width (meters) is described as follows.

Carriage way width Of road section (meters)	No. of Count posts	
	April--10	October--10
1. 6.01 - 8.50	49	47
2. 8.51 - 12.00	3	3
3. 12.01 – and above	9	8
Total	61	58

It is observed from Statement –1 that there were total 61 count posts in April-10 and 58 count posts in October-10 round, Of which there were 49 count posts in April round and 47 count post in October round on road carriage way width (RCWW) of 6.01.-8.50 meters, there

were 3 count posts in both rounds on RCWW of 8.01-12.00 meters, there were 9 count posts in April round and 8 count post in October round on RCWW of 12.01 and above meters.

- 8.4 The average per day traffic intensity or average daily traffic of power driven vehicles observed at 49 count posts in both the round with road sections of 6.01-8.50 meters carriage way width was about 31855 PCUs in April--10 round and was about 29177 PCUs in October-10 round. The traffic intensity for 60 count posts in April round and 57 count post in October rounds were reported more than 10,000 PCUs.
- 8.5 The average per day traffic intensity of power driven vehicles observed at 3 count post in both the round with road section of 8.51 -12.00 meters carriage way width was about 24201 PCUs in April-10 and it was about 25274 PCUs in October-10 round. Considering the norms of traffic capacity in PCUs the width of the above road section needs to be increased.
- 8.6 The average per day traffic intensity for power driven vehicles observed at 9 count posts in April round and 8 count post in October rounds with road sections of 12.01 and above meters carriage way width was about 64064 PCUs in April-10 round and it was about 62528 PCUs in October-10 round. Considering the norms of traffic capacity in PCUs the width of the above road section needs to be increased.
- 8.7 It is seen from the Statement-2 that maximum traffic intensity was recorded on Adalaj - Sarkhej road section at 94808 PCUs in April-10 and Adalaj - Sarkhej road at 105315 PCUs in October-10 round. The movement of Car New Tech. on Adalaj-Sarkhej road section of the total traffic intensity in April-10 round accounted for 35.32 percent and Car New Tech. on Adalaj -Sarkhej road section of the total traffic intensity in October-10 round accounted for 36.18 percent.
- 8.8 The road sections having the traffic intensity of more than 25,000 PCUs per day in any or both the rounds are given below for ready reference. Table-1(a)- shows road section having the traffic intensity for

more than 25,000 PCUs and less than or equal to 40,000 PCUs per day in any or both the round, while Table-1(b)- shows for more than 40,000 PCUs per day in any or both the rounds.

Table - 1 (a)

Road Sections having Traffic Intensity between 25000 To 40000 PCUs Per Day in Any or Both Rounds of the Year - 2010 (National Highway)

Sr. No.	Name of the District	Name of the Count Post	Road Section		Width in Mtrs.	PCUs. -2010

8.9 There are 38 road sections on National Highways having traffic more than 25,000 PCUs per day in any or both the round. It is observed from Table-1(a) that out of 12 road sections in the category of average traffic between 25000 to 40000 PCUs per day, maximum traffic intensity in April-10 rounds was noticed at Sarkhej count post on Ahmedabad-Bagodra road section of Ahmedabad district i.e. 39337 PCUs. It is noticed that movement of trucks on Ahmedabad – Bagodra road section accounted for 21.64 Percent of the total traffic intensity. Movement of Car, New Tech. and old Tech were 18.50 Percent. While Auto Riksha & Buses were 12.74 & 28.78 Percent respectively.

During October-2010 round maximum traffic intensity was noticed at R.T.O. Dahod count post on Ahmedabad-Indor road section of Dahod district Which was 37087 PCUs. It is noticed that movement of trucks accounted for 63.30 percent, while Car, New Tech and old Tech accounted for 14.19 percent while Two Wheeler and Basses accounted for 6.02 percent and 6.53 percent of the total traffic intensity respectively.

8.10 Very heavy traffic i.e .the traffic intensity of more than 40,000 PCUs per day in any or both of the rounds was observed on 26 road sections

shown in the Table-1(b). All these 26 road section are on National Highways No.6,8A, 8C, 8D and 59. The highest traffic intensity for April-2010 rounds was observed at Thaltej count post of Adalaj – Sarkhej road sections of Ahmedabad district Which was 94808 PCUs and for October-10 round the highest traffic intensity was observed at Thaltej count post on Adalaj – Sarkhej road section of Ahmedabad district which was 105315 PCUs. The highest traffic intensity on Adalaj-Sarkhej road section was due to heavy movement of Car New Tech. (35.32% PCUs), Std-Bus(6.83% PCUs), Two Wheeler (13.95% PCUs), Car Old-Tech. (20.49% PCUs) and Mini Bus (7.58% PCUs), in April-10 round. The highest traffic intensity on Adalaj - Sarkhej road section was due to heavy movement of Car New Tech (36.18% PCUs),Std. Buses (6.77% PCUs), Two Wheeler Vehicles. (13.60%PCUs) Car old Tech (19.92% PCUs) , Mini Bus (7.43%PCUs) in October-10 round. Hence the width of these road section are required to be increased for control the movement of traffic.

9. Analysis of data of State Highways:

9.1 The Information about the average Traffic Intensity per day in terms of equivalent Private Car Units (PCUs) on the selected count posts on various road section of State Highways is given in Appendix-2.

The round wise frequency distribution of the count posts by road carriage way width and by traffic intensity or traffic volume is given in statement-3. The average traffic intensity or traffic volume estimated on State Highways in terms of equivalent Private Car Units or Passenger Car Units or Passenger Car Equivalent (PCUs) per day is worked out as 10679 PCUs in April-10 round and 11325 (PCUs) in October-10 round. A list of count posts having traffic intensity more than 7,000 PCUs in either or both of the rounds is given in Statement-4.

9.2 The distribution of count posts on different road section by Road Carriage Way Width (mtrs.) is described as follows

Carriage way width of road section (meters.)	No. of Count posts	
	April-10	October-10
1. 3.00 - 5.00	148	147
2. 5.01 - 6.00	243	243
3. 6.01 - 8.50	353	356
4. 8.51 -12.00	39	40
5. 12.01- 15.00	12	12
Total	795	798

It is observed from Statement-3 that there were total 795 count posts in April-10 & total 798 count posts in October-10 round. Of which, there were 148 count posts in April-10 round and 147 count posts in October-10 round on road carriage way width (RCWW) of 3.00 to 5.00 meters; there were 243 count posts in April-10 round and 243 count posts in October-10 round on carriage way width (RCWW) of 5.01 to 6.00 meters there were 353 count posts in April-10 and 356 count posts in October-10 round on RCWW of 6.01 to 8.50 meters; there were 39 count posts in April-10 round and 40 count posts in October-10 round on Road Carriage Way Width (RCWW) of 8.51to12.00 meters. There were 12 count post in both the rounds on Road Carriage Way width (RCWW) of 12.01 and above meteres.

9.3 Out of 795 Count posts in April--10 and 798 count posts in October- -10 round per day traffic intensity of more than 7000 PCUs was observed at 511 Count posts in April-10 and 532 Count posts in October-10 round respectively.

9.4 Analysis according to road carriage way width :

(a) Carriage way width 3.00 to 5.00 meters :

The survey was conducted at 148 Count posts in April-10 and 147 Count posts in October-10 round on 3.00 to 5.00 meters

RCWW. Per day average traffic intensity of 5348 PCUs and 5771 PCUs for Power Driven Vehicle were found in April-10 and October-10 rounds respectively.

There were 3 count post in April-10 and 4 count post in October-10 round having heavy traffic intensity between 20001 to 50000 PCUs with carriage ways width 3.00 to 5.00 mtrs. in both the round. Highest traffic intensity was observed at Magarwada jun count post on chapi - vadgam road section of Banaskantha district, which was 22371 PCUs in April-2010 round and 24556 PCUs in October-2010 round.

- (1) Highest traffic Intensity at Magarwada jun count post for April-2010 round is due to heavy movement of Car New Technology. (13.20%) 2-XL Truck (13.77%), 3-XL Truck (9.69%), and Tractor without Trailer (7.56%) Animal driven vehicle (14.44) Tractor with Trailer (21.87%) which is 80.53% of total traffic (Statement-4).
- (2) For October-2010 round Magarwada jun count post traffic composition mainly comprises of Car New Technology. (13.44%), 2-XL Truck (12.26%), 3-XL Truck (9.37%) Tractor with Trailer (21.59%), Tractor without trailer (8.09%) and animal driven vehicle (14.37%) 2%) which is 79.12% of total traffic (Statement-4).

(b) Carriage way width 5.01 to 6.00 meters :

Traffic intensity survey on carriage ways width of 5.01 to 6.00 meters was done on 243 count posts in both the Rounds The average traffic intensity for power driven vehicle is 7464 PCUs in April--10 and 7745 PCUs in October--10 round.

Traffic intensity between 20001 to 50000 PCUs were recorded at 10 count posts in April--10 and at 12 count posts in October--10 round. Highest traffic intensity was observed at Harij count posts

on Harij-Patan road section of Patan district which was 27321 PCUs in April-10 and for October round the highest Traffic intensity was observed at Mundra P.Y.G.H. count post on Bhuj Mundra road section These road sections need to be widened as per the prescribed norms of traffic capacity.

The highest traffic intensity on Harij-Patan road section for April-2010 round is due to heavy movements of 2 – XL Truck (22.77%), Animal Driven vehicle (27.13%) Tractor with trailer (12.83%) Car New Technology (10.74%), Car old Technology (5.95) which is 79.42 of total traffic. For October-10 round highest traffic intensity on Bhuj-Mundra road section is due to heavy movements of 2–XL Truck (9.50%), Car New Technology (7.97%), 3-XL Truck (10.15%), M-XL Truck (18.50%), Tractor with trailer (20.89%), which is 67.01% of total traffic. (Statement-4)

(c) Carriage way width between 6.01 to 8.50 meters :

Survey was conducted on 353 count posts in April--10 and 356 count posts in October-10 on the road carriage way width between 6.01 and 8.50 meters.

Average per day traffic intensity for power driven vehicles is 11382 PCUs in April-10 and 12217 PCUs for October--10 round.

Out of total 353 count posts in April--10 and 356 count posts in October-10 round. 52 count posts in April-10 round and 56 count post in october-10 round. each recorded higher traffic intensity between 20001 and 50000 PCUS.

Highest traffic intensity was observed at Adipur R.H. count post on Gandhidham-Adipur road section of Kachchh district was 61057 PCUs in April--10 round and 60025 PCUs in October--10 round.

For April-10 round highest traffic intensity on Gandhidham-Adipur road section is due to heavy movement of

Standard bus (8.95%), Car New Technology (15.41%), 2 – XL Truck (15.29%) 3–XL Truck (14.11%), Auto Rickshaw (8.34%), LCV (9.53%) and Car Old Technology (8.06%) which is 79.69% of total traffic intensity (Statement-4).

For October-10 round Highest traffic composition mainly comprises of Car old Technology (6.64%), 3-XL Truck (14.43%), 2-XL Truck (13.38%), Car New Technology (18.61%), Auto Riksha (10.03%) and LCV (10.58%) which is 73.67 percent of total traffic intensity. These road sections need to be widened as per prescribed norms of traffic capacity (Statement-4).

(d) Road carriage way width between 8.51 to 12.00 meters :

- Survey was conducted at 39 count posts in April--10 and 40 count Posts in October--10 rounds.
- Average traffic intensity observed was 16728 in April--10 and 17589 in October--10 round for power driven vehicles.
- There were 13 count post in both round have recorded traffic intensity between 20001-50000 PCUs. The details are shown in Statement-3.
- Highest traffic intensity on 8.51 meters to 12.00 meters road is observed at Sanala count post on Rajkot-Morbi road section of Rajkot district in both the rounds.

For April--10 round highest traffic intensity was 68523 PCUs and for October--10 round it was 79247 PCUs.

In both the rounds intensity is due to heavy movement of 2 – XL Truck (16.97% & 16.03%), 3 XL Truck (18.14% & 17.50%), MXL (24.98% & 24.23%), Car New Technology (9.36% & 10.10%) which works out to be nearly 68% of total vehicle movement.(statement-4)

(e) Road carriage way width between 12.01 to Above :

On this way width survey was conducted at 12 count post in both the Rounds. Average traffic intensity recorded was 22119 PCUs and 21335 PCUs respectively for April--10 and October--10 round for power driven vehicles.

There were 5 count posts in April-10 round and 3 Count posts in October-10 round having heavy traffic intensity between 20,001 to 50,000 PCUs with carriage ways width of 12.01 and Above meters. Highest traffic intensity was observed at Kamrej count post on Surat-Kamrej road section of Surat district which was 68371 PCUs in April-10 and 68996 PCUs in October-10 round. .

The highest traffic intensity on Surat-Kamrej road section is due to heavy movements of 2–XL Truck (16.37%), Standard Bus (14.27%), Car New Technology (11.51%), 3-XL (10.31%), M-XL (15.37%) and Lcv (8.80%) in April--10 round and for October--10 round the highest traffic intensity is due to heavy movements of 2 – XL Truck (16.36%), Car New Technology (11.52%), Standard Bus (14.28%), MXL (15.40%) and LCV (8.80%). 3-XL (10.32%) which is 76.68% of percent of total traffic intensity. (Statement-4)

- 9.5 The road sections having the traffic intensity of more than 25000 PCUs per day in any or both the rounds are shown as under. Table-2(a) provides traffic intensity for 25,000 to 40,000 PCUs per day, while Table-2(b) provides for more than 40,000 PCUs per day. These tables are derived from Statement-4

Table - 2 (a)

9.6 There are 48 road sections on State Highways having traffic intensity more than 25,000 PCUs per day in any or both the round. It is observed from Table-2(a) that out of 38 road section in category of average traffic between 25,000 to 40,000 PCUs per day, maximum traffic intensity was noticed on, Chavand Count post of Rajkot-Bhavnagar road section of Amreli district which was 38173 PCUs in April--10 round and 39866 PCUs in October--10 round on Sevasi count post of Gotari-Sevasi Road Section of Vadodara district.

Rajkot-Bhavnagar road section with 6.10 Meters width was noticed the heavy movement of Std Bus (16.13%), Car New Technology (11.03%), 2 – XL Truck (18.42%) Mini Bus (15.57%) and Auto Riksha (6.01%) in April-10 round and for October--10 round the highest traffic intensity on Gotri-Sevasi Road section of Vadodara district is due to heavy movements of Two wheeler (14.51%), Car New (57.03%), Std Bus (6.80%) and Auto Riksha (5.55%).

It is Observed from table 2(b) that very heavy traffic i.e. the traffic intensity of more then 40000 PCUs per day was observed at Sanala Count post of Rajkot-Morbi road section of Rajkot district which was 68523 PCUs in April-10 round and 79247 PCUs in October--10 round.

		Gadhada Dhola Road	Vaghdhra	Bhavnagar	B.T	3.66	19825	19717
		Umralla Songadh	Umralla	Bhavnagar	B.T	3.66	584	611
		Shihor Varal Road	Shihor	Bhavnagar	B.T	7.00	2615	3783

Annexure

FUNCTIONS & STEPS INVOLVED

TO PREPARE TRAFFIC CENSUS RESULTS (TCR)

(a) Conduct of Census

1. Roads & Buildings department conducts the Traffic Census. Which is for 3 days on State Highway twice a year i.e. April Round and October Round.
2. Data collected in fix format. Road section wise count post wise.
District wise, Road width wise. type of vehicles wise.
3. The Traffic Census information is collected from Executive Engineer (Ex. En) / Superintendent Engineer (SE) of State Highway (SH).

(b) Conversion into Private Car Units (PCUs)

1. Different type of vehicles into comparable common unit known as equivalent Private Car Units (PCUs) suggested by Joint Technical Groups by Planning Commission, New Delhi.
2. The no. of vehicles passing both the road side by each count post is converted to PCUs by multiplying no. of vehicles passing and equivalent PCUs of the type of vehicles.

(c) Date Processing

1. Scrutinity, Data Collection, Coding, Processing and publishing TCR is done by DES-personnel.
2. Data entry in fix format for estimated 1,00,000 Data records in both Round in V.B. format (Visual Basic (VB)).
3. Sorting, validation, error correction and prepare parameter files by computer programming (COBOL Programme).
4. Merged the both round data & prepare annual results.
5. To prepare Statement 1 to 4 & appendices 1 & 2 based on Parameter file.

(d) Publications

1. Report writing preface cover page are prepared.
2. Publish Publication.
3. Users Interaction.

ABBREVIATIONS

The following symbols and abbreviations have been used in this
publication

1. - = Nil
2. B.T. = Black Top
3. P.C.Us. = Private Car Units
4. T.C.R = Traffic Census Results
5. N.H. = National Highway
6. S.H. = State Highway
7. Mtrs. = Meters
8. RCWW. = Road Carriage Way Width

**OFFICERS AND STAFF ASSOCIATED IN
PREPARATION OF
TRAFFIC CENSUS RESULTS, 2010**

Sr. No.	Name	Designation
1.	Shri R.N.Pandya	Director
2.	Shri V. I. Prajapati	Deputy Director
3.	Smt. S. R. Kharadi	Research Officer
4.	Shri M. M. Rathwa	Research Officer
5.	Shri R. P. Solanki	Research Assistant
6.	Smt. B. A. Joshi	Statistical Assistant
7.	Smt. U.M. Shrimali	Clerk
